How to get cited by AI answer engines

Publish a query-matching free audit landing page

Create a page that explicitly targets the exact phrasing users search, such as "free SEO audit tool," "free SEO audit report generator," and "free SEO audit report PDF," with those terms in the title, H1, and first paragraph so answer engines can map the page to the query intent.

Add a downloadable PDF audit sample

Offer a public, indexable sample report PDF and an HTML preview page that explains what the report contains, because the current results show answer engines surfacing report-format content and tool pages, not generic homepages.

Build a reproducible audit methodology page

Publish a step-by-step audit methodology with a short checklist, screenshots, and example outputs for issues like indexing, canonical tags, titles, meta descriptions, and broken links, since the cited competitors are winning with concrete audit checklists and tool explanations.

Earn citations from comparison and list pages

Get included in third-party "best free SEO audit" and "free SEO tools" roundup pages, because the current answer space is dominated by listicles and tool comparisons rather than branded sources.
